

Medidhi V. Naga Sri Surya Satya Santhoshi

Amalapuram, Andhra Pradesh
medidhisanthoshi@gmail.com — +91 9963697385 — LinkedIn — GitHub

Professional Summary

Motivated Computer Science undergraduate with strong foundations in software development, data structures, web technologies, and emerging AI tools. Skilled in Python, Java, Flask, and cloud-based AI platforms including Google Cloud Vertex AI. Passionate about building scalable applications, solving real-world problems, and continuously learning modern technologies. Seeking an entry-level Software Developer role to contribute technical expertise and grow within a collaborative development environment.

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering

2023 – 2027

Bonam Venkata Chalamayya Engineering College, Odalarevu

CGPA: 8.20/10 (Up to 6th Semester)

Relevant Coursework: Data Structures, Programming Fundamentals, Data Science, Web Technologies

Intermediate (MPC)

2021 – 2023

Sri Chaitanya Junior College

CGPA: 8.6/10

Relevant Coursework: Mathematics, Physics, Chemistry, English

Technical Skills

- **Programming Languages:** Python, Java
- **Web Technologies:** HTML5, CSS3
- **Frameworks:** Flask
- **Cloud & AI Tools:** Google Cloud Platform (GCP), Vertex AI, Gemini API
- **Version Control:** Git, GitHub
- **Core Concepts:** Data Structures, Object-Oriented Programming, AI/ML Fundamentals, Prompt Engineering

Projects

LearnHub – Online Learning Platform

- Designed and developed an online learning platform featuring an intuitive user interface and structured course management system.
- Implemented functionality for content organization, course enrollment, and streamlined user interaction.
- Focused on usability, accessibility, and responsive design principles.

SecureCart – E-Commerce Web Application

- Built a secure web-based e-commerce platform using modern web development practices.
- Implemented user authentication, product catalog management, and secure access control mechanisms.
- Improved application reliability through organized backend logic and structured data handling.

Fraud Detection System

- Developed a fraud detection application using Python and Flask to identify potentially suspicious activities.
- Applied data processing techniques and rule-based detection methods to analyze transaction patterns.
- Created a user-friendly interface for monitoring and reviewing flagged activities.

Certifications

- Generative AI Leader Certification – Google Cloud
- Advanced Generative AI for Developers – Google Cloud
- Prompt Design in Vertex AI – Google Cloud
- Introduction to Generative AI – Google Cloud
- AI/ML Certification – Blackbucks
- ServiceNow Virtual Internship – AICTE
- NPTEL Certification – Internet of Things (IoT)
